'how do you write $x = e^t$ and $y = 2t$ as a socratic

may 31st, 2020 - first of all i think that maybe there is a little mistake in your writing doesn't the function is $x = e^t$ $y = 2t$ instead of yours if i am right than $x = e^{\ln x}$ and $y = 2 \ln x$ rarry $e^{\ln x} = x$ rarry $x = e^{\ln x}$ this is because $e^{\ln x} = x$ and this is the equation of a parabola centered in $v = 1/0$ and that passes from the points $(0, 1)$ as you can see graph $x = 1/2$ '
